**Notification Concerning the Request for Extension
of the Implementing Agreement for a Co-operative Programme on Energy Efficient End-Use
Equipment (4E TCP)**

Dear Hans-Paul,

The Implementing Agreement for a Co-operative Programme on Energy Efficient End-Use Equipment ("4E TCP") has requested an extension ("RfE") for the period 1 March 2024 to 28 February 2029.

In accordance with the procedures established by the IEA Committee on Energy Research and Technology ("CERT") at its meeting held 16-17 February 2016, the 4E TCP submitted the End-of-Term Report, a Request for Extension Questionnaire and a Strategic Work Plan (together the "Supporting Documentation").

At its meeting held 19-20 September 2023, the Working Party on Energy End-Use Technologies ("EUWP") reviewed the 4E TCP Supporting Documentation and the presentation made by the Chair of the 4E TCP, and, following discussion, synthesised EUWP Delegates' comments into the Working Party Feedback Form (attached).

After review of the 4E TCP Supporting Documentation and the EUWP Working Party Feedback Form, the CERT agreed to extend the term of the 4E TCP for the period 1 March 2024 to 28 February 2029, subject to the Executive Committee amending the Implementing Agreement to incorporate the Framework for the Technology Collaboration Programme at the earliest opportunity, and at the latest by 28 February 2025.

Therefore, the CERT approved the extension of the Implementing Agreement from 1 March 2024 to 28 February 2025 and approved an automatic extension to 28 February 2029, effective upon certification by the IEA Secretariat that the Executive Committee has amended the Implementing Agreement to incorporate the Framework for the Technology Collaboration Programme.

Let me take this opportunity to congratulate you on the past achievements of the 4E TCP and to wish you every success in the coming term.

Yours sincerely,

Liselott Fredriksson
TCP Co-ordination Team
